

MUHAMMAD QASIM JAVED

+92 321 4622075 ◇ Lahore, Pakistan

muhammadqasimjaved19@gmail.com ◇ linkedin.com/in/m-qasim-javed ◇ github.com/jqasim522

OBJECTIVE

Software Engineering graduate with hands-on AI/ML experience, seeking to apply expertise in machine learning, NLP, and computer vision within a high-impact engineering environment.

EDUCATION

Bachelor of Software Engineering, University of Engineering and Technology
CGPA: 3.2

2022 - 2026

SKILLS

Languages	Python, C++, SQL, HTML5
AI/ML	TensorFlow, Keras, Scikit-learn, LangChain, Pydantic AI
Tools	Streamlit, FastAPI, PostgreSQL, MySQL, OpenCV, Git
Soft Skills	Communication, Time Management, Project Management

EXPERIENCE

AI Engineering Intern
Web3 Geeks

Aug 2026 – Sept 2026
Remote, Pakistan

- Built multi-agent systems in LangChain, LangGraph, and CrewAI with HITL interrupts, self-correction loops, and grounded RAG; shipped a **production UrduLish real-estate voice agent** (FastAPI + Docker + 11-node LangGraph; Groq Whisper + Edge TTS) with **99% grounding**, **0.1 hallucinations**, and integrated **Google Calendar + Gmail** for the full booking/reschedule/cancel lifecycle — [live on Railway](#)
- Engineered 8 domain features and tuned an ML pipeline (RandomizedSearchCV + calibration) on UCI Adult Census, lifting ROC-AUC 0.72 → **0.93** and F1 0.49 → 0.73; built multi-agent systems in LangChain, LangGraph, and CrewAI with HITL interrupts and grounded RAG.

AI Intern
Bookme

Summer 2025
Onsite, Pakistan

- Designed and deployed a personalized AI chatbot with RAG pipelines and real-time communication via Ably Protocol
- Implemented custom guardrails for safe, contextually accurate LLM responses
- Evaluated LangChain limitations and migrated the pipeline to Pydantic AI

PROJECTS

Neat Now(FYP) AI Waste Detection System Curated a 12,270-image dataset across 9 waste classes with 26,596 annotations; trained YOLOv8m achieving 82.5% mAP@50, 88.6% precision, and 72.9% recall for urban waste monitoring. (*Sep 2025 – May 2026*)

RealEstate Hub — UrduLish AI Voice Agent 11-node LangGraph; Groq Whisper + Edge TTS; Calendar booking; 99% grounding; 775 tests; live on Railway. (*August - Sept 2026*)

Heart Disease Prediction Built and deployed an ML classification system using FastAPI and Streamlit; managed patient data with PostgreSQL. (*Dec 2024 – Jan 2025*)
